WELCOME

"Balcony of the Atlantic", "City of Crystal", "Herculine City" are some of the names of A Coruña, the city where nobody is a stranger, venue of the 27th European Signal Processing Conference, **EUSIPCO 2019**.

On behalf of the Organizing Committee and the **EURASIP** leadership, it is our great pleasure to welcome you to EUSIPCO 2019 which will be held at the A Coruña Conference Center, PALEXCO, from September 2nd to 6th, 2019.

EUSIPCO 2019 offers an attractive technical program with more than 500 papers being presented in 78 lecture and poster sessions, of which 10 are special sessions. The program includes four plenary talks given by internationally renowned speakers, 10 tutorials presented by prominent experts, and two Satellite Workshops.

In order to encourage student participation, the future of our scientific community, the program includes the final rounds of two student-oriented competitions, the Student Paper Competition and the Three-Minute Thesis Contest.

We would like to thank all the authors who have submitted articles for presentation at **EUSIPCO 2019**. There were 820 submissions which required a huge amount of revision work distributed between Area Chairs and reviewers, wisely led by our Technical Program co-chairs, Sabrina Greco and Marius Pesavento. To all of them, thank you for your extraordinary effort.

Welcome

In addition to the technical activities, EUSIPCO 2019 offers an exciting program of social events with a welcome reception at PALEXCO; a visit to the Aquarium Finisterrae, a scientific museum dedicated to marine science; and a banquet at the Pazo de Vilaboa, a noble and beautiful nineteenth century building perfect to taste the traditional Galician cuisine.

The organization of EUSIPCO 2019 has been possible because of the work of countless people. We would like to thank all the members of the Organizing Committee for their work and assistance. Also, to the **EURASIP BoD** for believing in us for the organization of the conference. We thank the plenary speakers, the tutorial presenters, the special session organizers, the session chairs, and the satellite workshop organizers for their important contributions. At the local level, we thank the University of A Coruña Foundation and our Professional Conference Organizer, Océano Azul.

Finally, we are extremely grateful to all our sponsors, patrons, supporters, and exhibitors.

We hope that EUSIPCO 2019 will turn into an unforgettable experience, which will remain in the memory of the participants for its outstanding scientific quality, as well as for the charm of **A Coruña**, the beauty of its surroundings, the splendor of its history, the exquisiteness of its gastronomy, and the hospitality of its people.

ABOUT THE VENUE

Venue

A Coruña Conference Center (**PALEXCO**) has become an international reference for hundreds of companies, associations and agencies that have chosen to hold their events there.

Elegance and functionality are the keys to this project designed by César Portela and Ricardo Bofill, but even more impressive is the unique design of its roof, which resembles the wings of a giant seabird, in perfect harmony with the port setting and the city's intimate historical connection to the sea.

Palexco is strategically located facing the sea and right in the heart of A Coruña's historic center. Surrounded by the best hotels and restaurants and the most select shops.

Wi-Fi Area

The building is WI-FI enabled allowing connection to the internet.

Her main research interest is in signal and image processing using probabilistic models. She also works on parameter estimation, statistical learning and optimization techniques.

In terms of applications, she worked on speech processing (1982-1988), biological image processing (2001-2011), skin imaging (2009-2018) and remote sensing (1988-). She published a book on Markov random fields in image segmentation in 2012 (Now pub.), co-authored with Prof. Zoltan Kato. She was co-editor with Prof. Gabriele Moser of a book on mathematical models for remote sensing image processing in 2018 (Springer pub.). She has been nominated EURASIP Fellow in 2019. She is also a Fellow of the IEEE (2003) and was IEEE SP Society Distinguished Lecturer (2016-2017). She received the excellency award from Université Côte d'Azur (UCA) in 2016, several best paper awards with her students and collaborators, and was made "Chevalier de l'Ordre National du Mérite" by the President of the French Republic in 2002 for an exemplary career in research.

Yurii Nesterov

Yurii Nesterov is a professor at the Center for Operations Research and Econometrics (CORE) in the Catholic University of Louvain (UCL), Belgium. He received Ph.D. degree (Applied Mathematics) in 1984 at Institute of Control Sciences, Moscow. Starting from 1993 he works at Center of Operations Research and Econometrics (Catholic University of Louvain, Belgium).

His research interests are related to complexity issues and efficient methods for solving various optimization problems.

The main results are obtained in Convex Optimization (optimal methods for smooth problems, polynomial-time interior-point methods, smoothing technique for structural optimization, complexity theory for second-order methods, optimization methods for huge-scale problems). He is an author of 5 monographs and more than 100 refereed papers in the leading optimization journals.

He got several international prizes, among which there are Dantzig Prize from SIAM and Mathematical Programming society (2000), von Neumann Theory Prize from INFORMS (2009), SIAM Outstanding paper award (2014), and Euro Gold Medal from Association of European Operations Research Societies (2016).
